Summary

Results-driven Software Developer and AI Specialist combining rigorous analytical problem-solving from an aviation background with modern web technologies (React.js, Python, JS). Proven ability to architect scalable applications, deploy machine learning models, process complex datasets, and thrive in precision-focused, fast-paced environments.

Education

Bachelor of Technology in Computer Science (AI & ML) **Oct 2024 – May 2028**
Dronacharya College of Engineering *Gurugram, Haryana*

High School Diploma (10th & 12th Standard) **May 2023**
D.A.V. Public School, NH-3 *Faridabad, Haryana*

Experience

AI/ML Intern **Jun 2026 – Jul 2026**
Centre for Fire, Explosive and Environment Safety (CFEES) - DRDO

- Engineered an AI-powered wildfire detection system leveraging a hybrid inference pipeline, integrating Convolutional Neural Networks (CNN) with a physics-informed Spectral Fire Index (SFI).
- Architected a robust full-stack environment featuring a FastAPI backend and interactive React frontend for seamless environmental monitoring and data visualization.
- Collaborated with senior scientists to ensure the system aligned with technical development tasks, finalizing comprehensive academic and technical reporting.

Frontend Web Developer **Jan 2026 – Apr 2026**
Evian Engineering Pvt. Ltd. *Faridabad, Haryana*

- Architected a scalable B2B corporate platform (Live Preview) from the ground up, digitizing complex engineering portfolios (ETP, STP, WTP) to drive client acquisition.
- Optimized frontend performance utilizing modern web frameworks, accelerating initial page load speeds by **30%** and ensuring strict cross-device accessibility.
- Integrated advanced technical SEO strategies during the development lifecycle, optimizing core architecture and positioning the site for scalable organic growth.

Web Developer and SEO Specialist **Dec 2024 – Jan 2025**
Isha's Designer Studio *Rohtak, Haryana*

- Spearheaded end-to-end development of the official storefront (ishadesignerstudio.vercel.app), maximizing uptime and decreasing bounce rates by **20%**.
- Executed data-driven SEO strategies and semantic HTML best practices, securing higher local search engine rankings and a **45%** surge in organic user traffic.
- Overhauled the user interface with a mobile-first approach, boosting cross-browser responsiveness and extending average session duration by **25%**.

Projects

AI-Powered Wildfire Detection System | *React.js, FastAPI, CNN, Streamlit* | GitHub **Jun 2026 – Jul 2026**

- Architected a hybrid machine learning pipeline for accurate fire classification, equipping the system with robust alternative deployment tools including Streamlit interfaces and local CLI applications.

METAR-Sense (Aero Guard) | *Python, NLP, Prompt Engineering* | GitHub **Apr 2026 – Apr 2026**

- Developed an AI-powered aviation weather reasoning tool leveraging LLMs to parse and interpret complex atmospheric feeds for enhanced operational safety protocols.

GTA-6 Showcase Website | *React.js, GSAP, CSS Animations* | GitHub **Oct 2025 – Nov 2025**

- Programmed a highly interactive React.js web application utilizing advanced DOM manipulation and dynamic styling, driving user engagement and reducing bounce rates by **15%**.

Real-Time JS Weather App | *Vanilla JavaScript, REST APIs* | GitHub **Jul 2025 – Aug 2025**

- Integrated third-party RESTful APIs using asynchronous JavaScript (Fetch/Promises) to render live meteorological data across **200,000+** locations with sub-second latency.

Certifications

Data Analytics Virtual Experience | Deloitte (Forage) *April 2026*
Data Science Virtual Experience | British Airways (Forage) *April 2026*
Explore Engineering Virtual Experience | GE Aerospace (Forage) *April 2026*
Programming with Python 3.X | Simplilearn Skillup (Code: 9983721) *March 2026*
Artificial Intelligence Beginners Guide | Simplilearn Skillup (Code: 9983773) *March 2026*

Skills

Programming Languages: C, Java, JavaScript (ES6+), Python, R, SQL
Web Development: React.js, FastAPI, Vite, HTML5, CSS3, Tailwind CSS, GSAP, DOM Manipulation
AI & Data: TensorFlow, PyTorch, Convolutional Neural Networks (CNN), Prompt Engineering, LLMs, Natural Language Processing (NLP), Data Analysis, MySQL
Tools & Cloud: Streamlit, Git, GitHub, REST APIs, OpenAI API, Gemini API, VSCode, Figma
Core Competencies: Agile Development, Analytical Problem-Solving, High-Pressure Decision Making
